AUGUST 2009

Face the facts

VICKIE'S CORNER

Vickie Mickey, C.T.

25 boxes will be given away on September 1, 2009 in celebration of About Face Cosmetic Therapy Center's 25th anniversary. Each box will symbolize the year within the profession. The boxes will contain gift certificates for the winner to enjoy some of the many roads that my professional life has taken. Within the boxes various gift certificates will contain laser hair removal certificate (value \$2500.00) certificates for books, others will contain electrology gift certificates, skincare items, micro current certificates, micro-dermabrasion certificates and healthy items for the body.

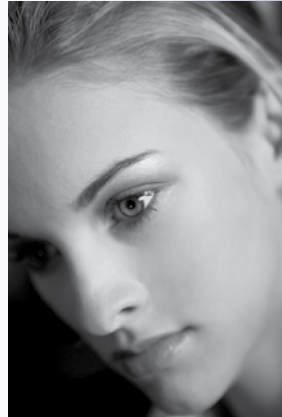

The office opened in September, 1984 in the original location across from the Dublin Library. The following year the bridge across 161 to old Dublin was to be closed for construction for the current bridge. As the construction was to take over a year, the office was moved to the 3001 Bethel Rd. location. The office was again moved to another suite within this building in early 1994. As the business grew with the addition of laser for hair removal, it was again necessary to move to the present location. In February of 2010 we will have been in this present location for 10 years. Over the years I have enjoyed the most interesting experiences due to the wonderful and exciting people I have had the opportunity to serve within this profession. I sincerely want to thank you for all the wonderful life experiences you have afforded me. Please join in celebrating our 25th anniversary on September 1, 2009 from 12- 5.

Commit to Perfect Skin Program

This program was introduced to provide the clients with a commitment to great skincare. The program permits the clients a micro-dermabrasion, glycolic peel, or hydra-facial for \$60.00 when performed monthly. Add an additional service for \$30.00 at time of service. Additionally, the Commit To Perfect Skin Program affords each member to one 10% savings. As with many programs we have done this as an honor program; About Face did it without a written contract. As with many programs one forgets to commit! So from this newsletter forward you will be required to sign a year contract that enables About Face to charge your credit card account for the \$60.00 if you fail to come in for the service that month.

NEWS WORTHY INFORMATION

Retin-A! Yes, more and more P. acne bacterium which causes acne breakouts is slowly becoming resistant to drugs. For many years physicians have used prescription antibiotics such as tetracycline and erythromycin to treat acne however the bacteria superbugs are changing, adapting and becoming more resistant. What does this mean? A mutated bacterial strain typically means that those cases of acne that have been effectively treated with antibiotics may flare up again. These new strains typically will respond to other methods of treatments such as benzoyl peroxide, anti-inflammatories and topical vitamin A (Retin-A). Recently Topix Pharmaceuticals has developed a new Retinol Plus Treatment Kit for Acne. It is available at About Face!

Talking about that P. bacteria, the clinical results from the use of the Clarisonic skin brush in the removal of the residual sebum that collects on the skin not only aids in the cleansing of the skin but removes 10 times as much sebum.

The most important issues in caring for skin with acne or rosacea is to cleanse properly, remove the dead dry cell to inhibit bacterial growth, and protect the skin from cellular damage. Proper home care is just as important as seeing a professional for treatment.

Accutane® has been removed from the market place. After many years of dermatologist prescribing Accutane®, the parent company, Roche Pharmaceuticals, has removed the medicine from the U.S. market after juries have awarded millions in damages to users. If you or someone in your family suffers from acne, please be aware that Dr. David Garcia has used the Smoothbeam® for over 7 years to treat all stages of acne. The clinical studies indicate 3-5 treatments resolve acne for up to 3 years. It is a much safer way to resolve the acne in ones life.

In one hour how often do you have eye movement? 10,000 times per hour! Wow, what a work out!
